SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, REST APIs, and database-driven applications. Built real-time and web-based projects using modern development practices. Seeking an entry-level software development role to apply and expand technical expertise

EDUCATION

SRI SARATHI INSTITUTE OF ENGINEERING & TECHNOLOGY -- NUZ

B.Tech

CGPA: 7.3

PROJECTS

ChatWave, | Django | Django REST Framework | WebSockets | SQLite

- One-to-one and group messaging with purpose-built database models for users, chat rooms, participants, and messages.
- Low-latency message delivery via Django Channels and WebSockets, handling concurrent connections efficiently.
- Scalable room architecture supporting both private and multi-participant communication in a single system.

Restaurant Management Web Application, | Django | DRF | React | SQLite

- Secure backend with Django ORM for CRUD operations, form validation, and SQLite integration — with session-based auth and protected routes.
- Real-time order tracking and status updates to improve operational throughput and staff visibility.
- Role-based server-side authorization preventing unauthorized access across all routes.

E-Commerce Platform, Django | DRF | React.js | PostgreSQL.

- REST APIs covering product catalog, cart, wishlist, and order management end-to-end.
- Admin dashboard for managing products, orders, and customer operations with role-based access control.
- JWT authentication, fine-grained permissions, and a demo payment workflow to simulate a production checkout flow.

SKILLS

Languages (Python) | **Tools** (GIT | GitHub | Postman | VS Code) | **Frontend** (HTML | CSS | JavaScript | React) | **Backend** (Django | Django REST Framework) | **DataBase** (SQL | SQLite)

CERTIFICATES

Python Full Stack (ExcelR)
